Dear Hiring Manager,

My name is Logan Bright, and I am writing to express my interest in the Clinical Prior Authorization Analyst position at CVS Health. I am an experienced pharmacy technician with over two years analyzing and communicating research during my undergraduate degree. I am excited to join the CVS Health community that prioritizes safety and quality and using my skills to simplify health care for all.

I have spent most of my time during my undergraduate education conducting research, where I have collected data, analyzed it, and presented it to varying audiences. As a lead research assistant at the College of Idaho and a summer research intern at Johns Hopkins University, I have conducted supervised and unsupervised analyses on varying datasets, including large, secondary datasets. I have presented research to various audiences, including student research conferences, psychological conferences, and statistical conferences. Furthermore, I have spent most of my undergraduate education working as a pharmacy technician. In this position, I have become familiar with the prior authorization process to solve them and communicate the process to patients every day. Additionally, I have built the skills to collaborate with pharmacists, medical doctors, and insurance representatives to provide medications to patients as quickly and safely as possible.

Along with my professional experiences, I have strong technical skills and interpersonal skills that will make me a great addition to the team at CVS Health. During my undergraduate education, I have taken a statistical machine learning course and a data visualization & manipulation course that have developed my query, visualization, and model building skills in both Python and R. Additionally, I have worked closely with Microsoft Office Products, especially OneDrive, Word, Excel, and PowerPoint. At the College of Idaho, I have pursued two majors and one minor, which has developed my abilities to balance competing demands and prioritize tasks to meet various deadlines. I am an innovative team player who is dedicated to making the workplace as efficient and happy as possible.

I am passionate about advancing business objectives in healthcare, especially pharmaceuticals, and translating complex data into clear, actionable insights. Thus, I am excited to join a team to use data to improve healthcare one person and one community at a time. Please contact me if you have any questions about qualifications or professional goals. Thank you for your time and consideration. I look forward to speaking with you soon.

Sincerely,
Logan Bright
